## **Beginner's Guide to HIPAA**

### ***What does HIPAA mean?***

HIPAA actually stands for "Health Insurance Portability and Accountability Act". It is also known as the Kennedy-Kassebaum Act. The general purpose behind HIPAA is:

1. To protect the confidentiality and security of the patient's health care information.
2. To improve efficiency in the exchange of information between the clinic/hospital and the patient's insurance company.

### ***But what does this have to do with our office?***

Our office has always strived for excellence in the protection of our patient's health care information. We will be making some enhancements to further increase and enforce that protection. Some of these changes will be very visible to our patients and their families. We want to inform our patients about some of the changes they can expect to see in 2003.

Patients will receive a multi-page document notifying them of our privacy practice and of their individual rights concerning their health information. They will be asked to sign a document stating that they have received this notice.

### ***So with HIPAA, patients are informed and their confidentiality is respected!***

At our office, our patients and their families can be confident that their personal healthcare information will be protected.
